Cooper Medical Supplies

At Cooper Medical, we specialize in providing affordable pulse oximeters along with other health and monitoring devices. Our owners are both Respiratory Therapists and we understand the importance of pulse oximetry and the need for our customers to obtain this technology at reasonable prices.

We carry everything from easy to use and read finger pulse oximeters for spot oxygen checks (SPO2). We also have downloadable pulse oximeters for extended use like sleep studies or long term oxygen trends. Our wrist oximeters are used for greater comfort during extended use and recording. The downloadable fingertip pulse oximeters and wrist pulse ox units have data capability that will allow you to print reports out and view your oxygen levels. Many of these units have rechargeable lithium ion batteries that will let your oximeter last for extended amounts of time to perform long oxygen trends and sleep studies.

Cooper Medical also carries top of the line hand held pulse ox units that have all the bells and whistles such as alarms, touch screen, large color display, downloadable capability for reports as well as memory for multiple patients. We also offer accessories for our oximeters. We also have a new Sale Page which has several high quality oximeters are greatly discounted prices.

At Cooper Medical, we have Tens Units for treatment of musculoskeletal pain. Tens units or Transcutaneous Electrical Nerve Stimulation is a device that uses electrical current for low risk nerve stimulation. Our newest items are our Stethoscopes. We have found a great quality product that we can offer at an amazing price. These stethoscopes compare to Littmann stethoscopes which retail for over 4-5 times the price of our brand.

Coming soon, Cooper Medical will be carrying a full line of CPAP and BiPAP machines and supplies! Check back with us soon because we will be offering the best prices to our customers.

Medical Supplies

CMS-50F Recording Wrist Oximeter: The CMS-50F Pulse Oximeter is one of the most comfortable unit for performing oxygen trends or overnight oxygen studies. The CMS50F can be used for monitoring daily activities and overnight sleep studies. The compact design of the CMS-50F is intended to give the patient greater freedom while improving patient compliance. This is best oximeter to use during activity because it is not as easily affected by

movement as fingertip oximeters and it also has an easy to read color screen. The CMS50F also has a rechargeable lithium ion battery that can be charged with the included USB cable or AC adaptor.

Cms-50d Plus Recording Fingertip Pulse Oximeter: If you are looking for an inexpensive CMS Pulse Oximeter that has the capability to perform overnight pulse oximetry trends or long term oxygen trends then the CMS-50D Plus is the oximeter for you. This is the most inexpensive data recording oximeter that we carry (or know about). The CMS 50D Plus comes with free software that you can analyze your data and look at or print graphs of your oxygen levels. It is powered from 2 standard AAA batteries.

Cms-50dl Fingertip Pulse Oximeter Blue: The CMS-50DL is an inexpensive but accurate fingertip pulse oximeter. The CMS50DL has all the features that you need for oxygen spot checks.

Features of the CMS-50DL Fingertip Pulse Oximeter:

- All in one oxygen saturation (SPO2) probe and display module
- Can be used in: hospital, home, community medical treatment, sports healthcare, etc.
- Can measure oxygen saturation (SPO2) and pulse rate accurately
- Display shows oxygen saturation (SPO2) and pulse rate, and bar graph to show signal strength.
- Low battery voltage indication
- Low power consumption; will shut off automatically when no signal is present
